Hi Dave:

At the request of the Town of Lewiston, we reached out to other homes across from HTC. Two residents then asked us to perform gamma surveys. We had some technical issues and will have to go back to survey in the next two weeks. So no real info to report right now on that.

Attached are the preliminary data products from Area 5. Please let me know that you received one table and two images. I am sending from my iPhone since I am at a training. This data is preliminary and not validated. However, we do not see exceedance of the radionuclides of concern. Which is good news. No gamma readings and now no elevated radiological in soil samples. The reason for this assessment at area 5 was the history provided. The roadway within cemetery property was said to continue across the street onto this specific property. Roberts Street sample also did not show elevated levels.

Regards,

Eric
